

Index of Examples

Example 1 Using .NET classes in VBA	3
Example 2 Mark a Class as COM Visible	5
Example 3 Register a C# COM Component	6
Example 4 ExcelUDFBase (with Registration Functions Only)	9
Example 5 First Example of Excel UDF	10
Example 6 excel.exe.config file	12
Example 7 Implementing IDTExtensibility2 Interface	14
Example 8 Volatile Excel UDF	15
Example 9 Excel UDF Parameters	20
Example 10 Excel Array Function	23
Example 11 Excel Array Function (with auto-detecting calling range size)	24
Example 12 Excel UDF with Optional Parameter	26
Example 13 RTD Function	31
Example 14 Using RTD Server in VBA	51
Example 15 CodeDomProvider Interface	63
Example 16 Reflection – Instantiate a Class	65
Example 17 Reflection – Invoke a Method	66
Example 18 Script Compiler	68
Example 19 Script Source	69
Example 20 ScriptCompiler Test Driver	70
Example 21 Executing In-Memory Assembly	70
Example 22 IScript Interface	71
Example 23 Executing In-Memory Assembly (Revised)	73
Example 24 A Proprietary Script	74
Example 25 Translate Proprietary Script to C#	75
Example 26 Scripting Editor - Display Compilation Error	83
Example 27 Scripting Editor – Locate Problematic Source Code	83
Example 28 Invoking DLL Function – MessageBeep	88
Example 29 Invoking DLL Function – Passing by Reference	96
Example 30 Invoking DLL functions - <i>CharSet</i>	97
Example 31 Invoking DLL Function - System Handle	99
Example 32 Invoking DLL functions - <i>CallingConvention</i>	100

Example 33 Invoking DLL Function – Error Handling	101
Example 34 Net2StdString() and Std2NetString()	105
Example 35 Employee.h	106
Example 36 Standard C++ and managed C++ Bridge	107
Example 37 Test Driver for Calling Standard C++ Library from C#	108
Example 38 Web Service Server	118
Example 39 Web Service Client Application	126
Example 40 Remotable Object	128
Example 41 Remoting Service Provider (Configuration File Based)	129
Example 42 Remoting Configuration	130
Example 43 Remoting Service Provider (Code Based Configuration)	130
Example 44 Remoting Service Consumer	132
Example 45 Attachable Application – Attach to Remote Engine	136
Example 46 Using FileSystemWatcher	150
Example 47 Trade Cache	157
Example 48 ExcelUDFBase (Complete)	160
Example 49 Multithreading	161
Example 50 TCP Server	164
Example 51 TCP Client	166
Example 52 Multicast Publisher	168
Example 53 Multicast Subscriber	170
Example 54 Windows Service	171
Example 55 Minimizing A Window to System Tray	174
Example 56 FindAllTypesThatImplement	175
Example 57 String2Enum	176
